Professional Summary

Full-Stack JavaScript Developer building SaaS and real-time web applications with React, Next.js, Node.js, and PostgreSQL. Experienced in multi-tenant architecture, payment integrations, JWT-based authentication, and cloud deployments, taking features from development to production.

Skills

Languages: JavaScript, TypeScript
Frontend: React.js, Next.js, Tanstack Start, Redux, Tailwind CSS
Backend: Node.js, Express.js, Fastify, REST APIs, GraphQL, Socket.io
Database: MongoDB, PostgreSQL, Prisma, Mongoose
Cloud & DevOps: Docker, GitHub Actions, Google Cloud Run, Vercel, Netlify
Tools: Git, GitHub, Postman

Experience

Fullstack Developer • Full-Time <i>Technoholic Advance Solutions</i>	Apr 2025 – Present Karachi, Sindh
- Built real-time SaaS features using Node.js and PostgreSQL in a multi-tenant system with tenant-based data isolation for different organizations. - Implemented JWT-based authentication, 2FA, and temporary AWS S3 signed URLs to improve application security and secure file access. - Integrated Stripe and PayPal webhooks to automate subscription renewals, payment status updates, and refund handling. - Integrated Google Static Maps into property listings, allowing users to preview property locations directly within the dashboard.	
Fullstack Developer • Contract <i>Unique Advertisers</i>	Oct 2024 – Mar 2025 Karachi, Sindh
- Optimized MongoDB aggregation pipelines, reducing average query response times from 1.5s to under 500ms. - Improved frontend maintainability by migrating reusable components to TypeScript and reducing unnecessary React re-renders using memoization. - Rebuilt the company website using Tailwind CSS with a fully responsive layout and improved page load performance.	

Education

BS Software Engineering <i>Virtual University of Pakistan</i>	Expected 2029 Karachi, Sindh
Diploma in Information Systems Management <i>Aptech Pakistan</i>	Oct 2024 Karachi, Sindh
