Professional Summary

Full-Stack JavaScript Developer with 1.5+ years of professional experience building SaaS and real-time web applications with React, Next.js, Node.js, and PostgreSQL. Experienced in multi-tenant architecture, payment integrations, JWT-based authentication, and cloud deployments, taking features from development to production.

Skills

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, Tanstack Start, Redux, Tailwind CSS

Backend: Node.js, Express.js, Fastify, REST APIs, GraphQL, Socket.io, Redis

Database: MongoDB, PostgreSQL, Prisma, Mongoose

Cloud & DevOps: Docker, GitHub Actions, Google Cloud Run, Vercel, Netlify, AWS

Tools: Git, GitHub, Postman

Experience

Fullstack Developer • Full-Time

Apr 2025 – Present

Technoholic Advance Solutions

Karachi, Sindh

- Built real-time SaaS features using Node.js and PostgreSQL in a multi-tenant system with tenant-based data isolation for different organizations.
- Implemented JWT-based authentication, 2FA, and temporary AWS S3 signed URLs to improve application security and secure file access.
- Integrated Stripe and PayPal webhooks to automate subscription renewals, payment status updates, and refund handling.
- Integrated Google Static Maps into property listings, allowing users to preview property locations directly within the dashboard.

Fullstack Developer • Full-Time

Oct 2024 – Mar 2025

Unique Advertisers

Karachi, Sindh

- Optimized MongoDB aggregation pipelines, reducing average query response times from 1.5s to under 500ms.
- Improved frontend maintainability by migrating reusable components to TypeScript and reducing unnecessary React re-renders using memoization.
- Rebuilt the company website using Tailwind CSS with a fully responsive layout and improved page load performance.

Education

BS Software Engineering

Expected 2029

Virtual University of Pakistan

Karachi, Sindh

Diploma in Information Systems Management

Oct 2024

Aptech Pakistan

Karachi, Sindh

Projects

Digital Tenant | React, Node.js, Express, MongoDB, Stripe

- Built a multi-tenant property management platform with role-based access control (RBAC), tenant-level data isolation, and Stripe subscription billing.
- Developed role-specific dashboards for landlords, tenants, and service professionals with real-time notifications and lease/invoice management workflows.

SyncForge | Next.js, Node.js, Fastify, Socket.io, WebRTC

- Built a real-time collaboration platform with Socket.io and WebRTC supporting instant messaging, voice/video calls, and file sharing across multiple users.
- Designed a Fastify backend with JWT authentication, managing user sessions and real-time room state across concurrent connections.
